Marks : 60%

PROEJCT

Online Movie Ticket Booking System

Description:

Developed a fully functional Movie ticket booking system. The system incorporated features such as user registration, event selection, seat reservation, payment processing, and email confirmation.

Roles and Responsibilities:

- Designed the database schema for storing event details, user information, and bookings.
- Implemented the frontend user interface using HTML, CSS, and JavaScript.
- Developed the backend to handle user requests and manage the database.
- Integrated a payment gateway (e.g., PayPal) to facilitate secure transactions.
- Implemented email notifications to send booking confirmations and event updates to users.

Key Achievements:

- Successfully launched the project & tested with 10 users.
- Received positive feedback from users for the ease of use and functionality of the system.
- Collaborated with a team of 3 to meet project deadlines.

Technologies Used:

HTML, CSS, JavaScript, Python, PayPal API
